Traditional Palisade Fencing

Strong, durable steel perimeter protection

Steel pales, rails and tamper-resistant connections

1. Profiled steel pales form a strong, difficult-to-grip barrier.
2. Strong horizontal angle rails support the pales across each 2.75m bay.
3. Anti-tamper M8 pale and M12 'permacone snap-off' rail fixings secure the assembly.
4. Solid steel RSJ posts are available in dig-in or bolt-down configurations.

System Features

- Strong cold-rolled steel pales
- Difficult-to-grip pale profiles
- Anti-tamper security fixings
- Galvanised or powder coated
- Replaceable system components

Matching gates and accessories available

Applications Include

- Commercial & industrial sites
- Schools & sports grounds
- Railways & transport facilities
- Storage yards & parking areas
- General perimeter security

Steel Palisade Perimeter System

Palisade fencing provides a strong, visible boundary for sites requiring dependable perimeter security. Robust vertical steel pales help deter climbing and unauthorised access, while the open construction maintains visibility through the fence. Available in heights from 1.8m to 3.0m, the system combines profiled pales, horizontal rails and steel posts in 2.75m bays.

Traditional Palisade Fencing

Strong, durable steel perimeter protection

System Specification / 2750mm Bay

Fence height	1.8m	2.0m	2.1m	2.4m	3.0m
Pales per bay	17	17	17	17	17
Post centres	2750mm	2750mm	2750mm	2750mm	2750mm

Typical D or W section kit configuration. Component sizes and quantities may vary with the selected specification.

Pales, Posts & Rails

Pales: W-section steel pales with triple-pointed, round and notched, or single-point tops. Alternative profiles include D-section. Confirm the required profile and specification when ordering.

Posts: 127 x 45mm RSJ section in the W and D section kit ranges, with dig-in or bolt-down options. **Rails:** top and bottom rails, 2750mm long.

Fixings: M8 bolts secure the pales and M12 bolts secure the rails. Snap-off nuts help resist tampering after installation. Standard and corner fishplates are available.

Standard and corner fishplates

Anti-tamper bolts & snap-off nuts

Typical Bay Kit

Component	Qty
Palisade fencing post	1
W or D section steel pales	17
Top rail / bottom rail	1 each
Fishplates	2
M12 bolts / M8 bolts	4 / 34

End posts are additional where required. Ground anchor bolts for bolt-down posts are purchased separately to suit the installation surface.

Finish & Options

Galvanised steel with optional polyester powder coating. Standard colours are green and black, with blue and other colours available on request.

Green / Black / Blue

Manual palisade gates are available for pedestrian and vehicle access, with widths from 1.2m to 10.0m. End and corner kits, replacement posts, pales and rails are sold separately.

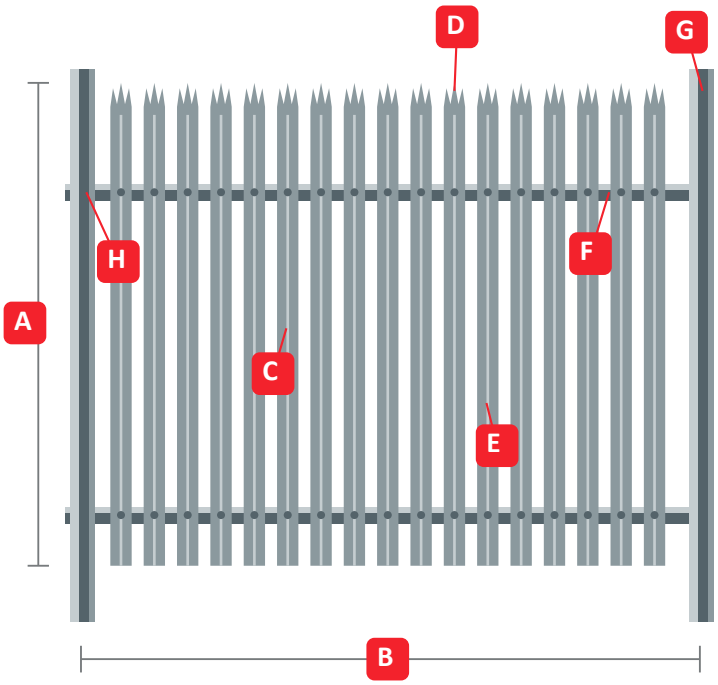

Specify your height, pale profile and top, post fixing and finish when requesting a quotation.

Strong, durable steel perimeter protection

Technical Specification

- **A** **Fence height:** 1800, 2000, 2100, 2400 or 3000mm
- **B** **Bay width:** 2750mm post centres
- **C** **Pale profile:** W section or D section
- **D** **Pale top:** Triple pointed, single point, or round and notched
- **E** **Pale thickness:** 2 or 3mm, depending on profile and height
- **F** **Horizontal rails:** 50 x 50 x 5mm hole punched angle rail
- **G** **Posts:** 127 x 45mm RSJ; dig-in or bolt-down
- **H** **Connections:** Standard and corner fishplates; M8 pale and M12 rail fixings

Typical bay illustration - not to scale

W Section

Height	Width	Pale thickness	Pales	Angle rail section	Post section
1.8m	2.75m	2mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
2.1m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
2.4m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
3.0m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ

D Section

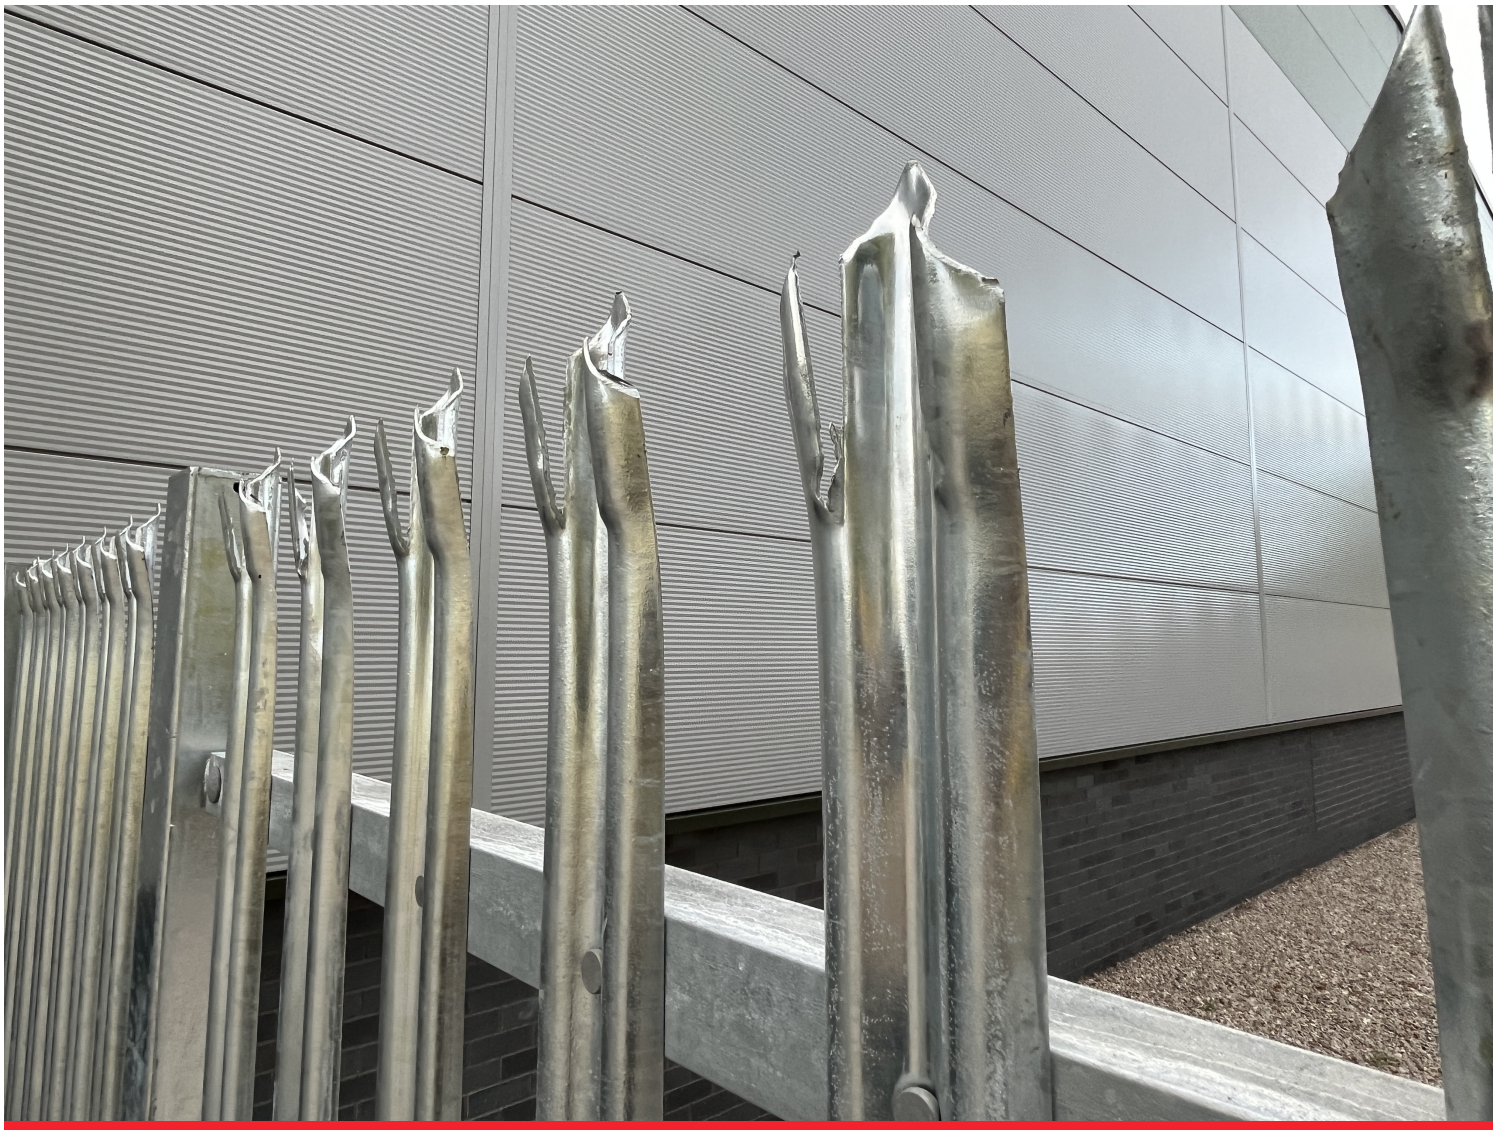

Height	Width	Pale thickness	Pales	Angle rail section	Post section
1.8m	2.75m	3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
2.1m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
2.4m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ
3.0m	2.75m	2 or 3mm	17	50 x 50 x 5mm hole punched angle rail	127 x 45mm RSJ

Pale and rail options vary by specification. Confirm the required combination when ordering. For the 2.0m kit option, confirm pale thickness and rail section at quotation.
