Profiled Mesh Perimeter System

Taurus 3D45™ is the ultimate in versatility; offering an affordable and robust system which is pleasing to the eye and easy to install. The system combines vertical and horizontal wires in a profiled panel configuration and is fixed with our Taurus security clip and anti-tamper bolt into factory fitted threaded post insert. The panel width is 3000mm which allows for a saving on installation times. This is a hugely specified system and lends its use to multiple low to medium security requirements.

Panel, Post, Clamp Bars:

The Taurus 3D45™ system allows for "stepping" to follow the topography of the site without any compromise in security and with no time consuming/ costly modification requirements on site. The security steel clip fixing system is both robust and incredibly easy/fast to install.

Our custom Taurus anti-tamper fixings ensure that even the most difficult of site conditions will not hamper the appearance or performance of the system.

Aesthetically pleasing, easy to install and at a price to suit almost any budget.

System Finish:

Our Taurus 3D45™ panels are manufactured to BS 4102:1998 and pre-galvanised with a zinc coat weight to conform BS EN 10244-2:2009 class D prior to polyester powder coating.

Taurus posts are manufactured in house to ensure conformity, when requested to BS EN 10305:2016 and are galvanised to BS EN 10346:2015. Panels, posts & clamp bars are polyester powder coated to BS EN 13438:2013.

All items undergo rigorous multi-stage inspections to ensure conformity to the above standards and contribute to our 10 year product guarantee.
